The iri of the Late EgyptianThird Future

New notices on the type of the nominal subject*

Mohamed Farag Sabra

Lecturer at Egyptology dept., Faculty of Archaeology, Sohag University

E-mail address: Mohamed_Farag@arch.sohag.edu.eg

Abstract

This paper highlights the type of nominal subject after the iri of the Third Future. The corpus of the study includes literary and non-literary texts of dynasties 19-22. Moreover, the instances enclose the normal future construction (the so-called Third Future) and the two rare construction of the future (analogue Third Future) which are derived from the Third Future. The corpus provides new notes on the type of the nominal subject where it appeared that iri of the Third Future is an official form than the iw because iri is frequently attested before the names of gods/goddesses, royal names, and names of rulers of foreign countries and nobles particularly in the texts on the Battle of Qadesh and the Egyptian-Hittite Peace Treaty. On the contrary, iw is rarely attested before the nominal subject of the Third Future in the corpus and it frequently appears before things and other normal names.

Introduction

As known, the Late Egyptian Third Future $iw.f \ r \ sdm$ is derived from the Middle Egyptian pseudo-verbal construction pattern¹. It is frequently attested in both literary and non-literary texts of Late Egyptian and is still in use in Coptic. The particle iw is

^{*} I am grateful to my supervisor Professor Dr. Helmut Satzinger for his reading and for his comments on this paper. I also would like to thank Professor Dr. Günter Vittmann for his reading and for his comments. I acknowledge support for this work by the Egypt Ministry of Higher Education (Joint Supervision program from the Egyptian Cultural Affairs Sector and Missions) under the Fifth Mission Plan for the year 2014–2015, as well as DLE Forschungsservice und Nachwuchsförderung fund (Abschlußstipendium), University of Vienna year 2020.

¹ F. Neveu, The Language of Ramesses: Late Egyptian Grammar, Translated by Maria Cannata, Oxford 2015, 76; A. Gardiner, Egyptian Grammar: Being an Introduction to the Study of Hieroglyphs, 3rd revised ed. Oxford 1957, 253-254§332.

indispensable with the so-called Third Future because it conveys itself the futurity and not by the r + infinitive of the Middle Egyptian future². The *iw* precedes both nominal and pronominal subject of the Third Future. Besides iw of the Third Future appeared in the texts of the 19th Dynasty (KRI, I, 324 [1]) new form preceded by the particle iri which only attests before the nominal subject of the future. On the other hand, Kruchten³ thought that the first appearance of the *iri* was in the 18th dynasty. He presented uncertain and unclear examples from the 18th Dynasty. It is challenging to decide which one of those attestations is the so-called Third Future or a prospective *sdm.f* or other construction. This paper focuses on the type of nominal subject after iri. As many grammar books discussed the Third Future tense iw.f r sdm and iri N r sdm, the following part features the morphology of the *iri* and the opinion of the scholars about its origin. Then it comes to the examples of the nominal subject after iri and iw and finally the new observations on the type of the nominal subject as follows:

The morphology of the iri

The following table displays the forms of iri of the Third Future. The two forms a and a are more frequently used before the nominal subject than the other forms in the table below. The iri is sometimes written a after the relative nty^4 . Korostovtsev mentioned that iri is also written a as shown below.

Table 1 forms of the verb iri

The origin of the iri

The following scholars explained the origin of *iri* as follows: Erman⁶ suggests that the verb *iw* "to be" is replaced by *iri* in LE in the case of a nominal subject.

Gardiner indicates that iri might be the verb iri "do" because a future tense might be derived from the meaning "N will act to hear." He also suggests that the construction is in case of a nominal subject a mere alternative to w.f. r sdm and iri N (r) sdm and Coptic future constructions iw.f r sdm and $epe-\pi pwie cwi. As Coptic did not attest to any negative example in the case of the nominal subject after <math>epe-\pi pwie cwi. he argued that the <math>iri$ before the nominal subject is due to the adhesion of the preposition r to iw. Korostovtsev epsilon argues that epsilon in the semantic point of view, the replacement of epsilon epsilon in the semantic point of view, the replacement of epsilon eps

Junge⁹ considers *iri* as merely a graphonemic variant of *iw*.

To conclude the above explanation of the scholars, *iri* is a mere alternative with *iw* of the Third Future or is a variation of *iw*. It is clear that the *iri* is not a mere alternative with *iw* because the instances below appeared that *iri* is officially used before the

12 RITA, II, 84.

¹⁰ Gardiner mentioned in JEA 16 (1930:222-223) that the preposition hr occurs before the infinitive as a pseudo-archaism in all kinds of Late-Egyptian constructions. As hr before the infinitive is only attested once before the infinitive, Gardiner also see that the example with hr is entirely without grammatical significance.

¹¹ A. Gardiner, Late-Egyptian Miscellanies, Bibliotheca Aegyptiaca 7, Bruxelles 1937, 62a [10 a]. He pointed out that the preposition hr is not necessary here. May be it is written wrong instead of the preposition r

Conclusion

By analyzing the texts of LE, the instances has shown that the auxiliary iri only preceded the nominal subject from the 19th Dynasty onward, particularly in the texts of the Battle of Qadesh and the Egyptian-Hittite Peace Treaty. The corpus has shown that *iri* of the future is used before the names of gods/goddesses, royal names, the rulers of foreign countries and nobles 26 out of 35 times. On the contrary, *iw* is only attested before things and other names 7 times. To sum up, the corpus has shown that *iri* is frequently attested in official texts such as diplomatic and historical texts (the texts of the Battle of Qadesh and the Egyptian-Hittite Peace Treaty).
